## SECRETS OF BATCH PROCESS SCALE-UP

Ensuring Effective Translation of Laboratory  
Processes to Pilot Plant Scale

10-12 APRIL 2018

### **Boston, USA**

Boston Metro  
Meeting Center

"Fantastic course.  
Numerous real world  
examples made content  
relevant. Really enjoyed the  
class activities, great way  
to keep audience engaged.  
Excellent speaker, very  
experienced and knew  
his stuff."

**Bayer Pharma AG**

A 3 day course given by  
**Francis X. McConville**

### PROFESSIONAL DEVELOPMENT TRAINING

Scientific Update provides training courses for industrial chemists and chemical engineers in chemical development and scale-up and many other specialist topics in organic and process chemistry. Our short intensive training courses enable scientists to learn about highly relevant topics, to broaden their knowledge and to keep abreast of new science, new technology and new techniques.

# SECRETS OF BATCH PROCESS SCALE-UP

A 3 day course given by Francis X. McConville

10-12 April 2018 Boston, USA, Boston Metro Meeting Center

## INTRODUCTION

Operating a commercially viable chemical process requires a good chemical synthesis to start with, but is also subject to the interplay of a myriad of important physical phenomena – heat transfer, mass transfer, fluid flow, etc. which are traditionally the realm of the chemical engineer. An understanding of these scale-up phenomena is crucial for the laboratory development of processes that will scale successfully.

This course presents an overview of these issues and examines their impact on process operation in the pilot plant and beyond, including scale-up considerations for route selection, raw material charging, reaction steps, workup, crystallization, product isolation, drying, etc. Common bench techniques for each of these steps are contrasted to the safety and operability criteria for successful pilot plant operation. Numerous examples and case histories are presented, along with tips and techniques for operators and experimenters. Heavy emphasis is placed on process safety.

### Who should attend?

This course has been designed for synthetic chemists, process development chemists and process engineers in the pharmaceutical and fine chemical industries with limited pilot plant experience, who wish to learn more about the potential pitfalls of process scale-up and ways to avoid them.

### Complimentary Literature

As part of the registration fee of this course, each participant will receive a copy of The Pilot Plant Real Book – A Unique Handbook for the Chemical Process Industry, authored by Mr. McConville. In addition, a course binder containing the full content of the course materials will be provided.

## COURSE OUTLINE

### Process Design for Scale-Up

- > Process development strategies
- > Importance of engineering in PD

### Scale-Up – An Overview

- > Role of the Pilot Plant
- > Overview of scale-up issues
- > Technology transfer issues

### Batch Reactors

- > Typical plant operations and equipment
- > Characteristics of batch operations

### Raw Materials

- > Raw material and route selection
- > Large-scale charging methods and issues

### Temperature Control

- > Large scale temperature control
- > Heat transfer in batch reactor
- > Controlling exothermic reactions

### Following Reaction Progress

- > Reaction endpoint determination
- > Sampling methods / issues
- > On-line analytical techniques

### Agitation and Mixing

- > Large scale mixing equipment
- > Mixing limited reaction
- > Mixing scale-up / scale-down

### Quench & Work-Up

- > Liquid-liquid extractions
- > Phase continuity issues and emulsions

### Distillation & Stripping

- > Differential distillation
- > Azeotropes and solvent exchange

### Crystallization and Precipitation

- > Basic principles / yield estimation
- > Controlling supersaturation
- > Scale-up issues

### Product Isolation and Drying

- > Large-scale solid-liquid separations
- > Filtration and drying equipment
- > Filtration and drying modeling

### Process Hazards and Safety Assessment

- > Common hazards in large-scale processing
- > Process hazard assessments and evaluations

Multiple attendees discounts  
**UP TO 15% available**

## VENUE

### The Metro Meeting Centers

101 Federal Street, 4th Floor  
Boston  
MA 02110  
USA  
(617) 737 1200

[www.metromeetingcenters.com](http://www.metromeetingcenters.com)

### Transport

Metro Meeting Centers is 10 minutes from Boston's Logan International Airport and within a short distance to public transportation.

A list of nearby hotels will be sent to you when you register.

# SCIENTIFIC UPDATE

*We've got chemistry*

**Start** 8.30am - Tuesday 10 April

**Finish** 5.00pm - Thursday 12 April

**Course Dinner** 6.30pm - Tuesday 10 April

**Course Fee:** \$2,200

Which includes comprehensive course manual, refreshments throughout the day, lunch and one course dinner.

**Course Fee:** \$2,200

## COURSE TUTOR

### Francis X. McConville

Francis X. McConville holds a B.Sc. degree in Chemistry and M.Sc. degrees in both Chemical Engineering and Biotechnology from Worcester Polytechnic Institute in Massachusetts. He has some 35 years of experience in the chemical and related industries, including positions at the Worcester Foundation for Experimental Biology and New England Renewable Fuels, where he was involved in such varied projects as oil recovery and biomass conversion.

He also spent 14 years at Sepracor, Inc. (now Sunovion) in the U.S. as a pharmaceutical process development engineer. His duties there included the design and operation of the company's kilo-labs, as well as the scale-up and transfer of many proprietary API processes to pilot and manufacturing sites in Taiwan, Japan, England, Scotland, and Canada. He was closely involved in the development and optimization of processes based on a variety of

technologies including selective biocatalysis, fermentation, ultrafiltration, and asymmetric crystallization.

For the past 12 years, Mr. McConville has worked at Impact Technology Development, Inc. in Devens, Massachusetts as a consultant, technology specialist and senior team leader. At Impact, Mr. McConville has been involved in such diverse projects as biomass conversion, emulsion polymerization, medical adhesives development, novel molten metal technology, and pharmaceutical crystallization optimization.

Mr. McConville is perhaps best known as the author of the popular manual for process development personnel entitled "The Pilot Plant Real Book – A Unique Handbook for the Chemical Process Industry". This highly practical handbook has garnered praise from readers in the fine chemical and pharmaceutical industries worldwide. Interested readers can learn more about the book at

 [www.pprbook.com](http://www.pprbook.com)

## REGISTRATION

You can either use our fast online booking system or mail or fax the attached registration form to:  
Scientific Update  
Maycroft Place, Stone Cross, Mayfield,  
East Sussex, TN20 6EW, UK  
Fax Number +44 1435 872734

### How to Pay

When you register online, you can have the option to pay via credit card (Mastercard or Visa). A receipted invoice will be automatically generated once paid and sent via email. Should your company wish to pay by cheque or bank transfer bank details will be supplied with an invoice.

### Bank Transfer or Cheque

Should your company wish to pay by cheque or bank transfer, on booking you can choose between paying in either €, \$ or £. All bank details will be supplied with an invoice.

### Group Discounts

Group discounts are available on two or more attendees - see registration form. This offer only applies if bookings are made simultaneously and from the same billing address.

### Confirmation of your registration

These will be sent via email.

### Late Applications

For late applications, please register online or fax the completed registration form, including credit card payment information.

### Cancellations/Refunds

Should you be unable to attend and cancel in writing no later than 1 month before the start of the course, Scientific Update will refund your registration less £300 (or equivalent in €/€) processing fee. Unfortunately refunds are not possible after that date. Substitutions can be made at any time.

## IN-HOUSE COURSE

For 13+ people contact us to discuss holding this event In-House - [sciup@scientificupdate.com](mailto:sciup@scientificupdate.com)

## COURSE AIMS AND OBJECTIVES

To teach the practical aspects of designing a scaleable fine-chemical batch process and successfully implementing it at the kilo-lab and pilot plant scale, through an examination of the effects of large-scale operating methods and equipment limitations on process safety, operability, yield, selectivity and product quality.

Upon completion of the course, participants will be better equipped to:

- > Assess process safety and scaleability
- > Identify process operations that may be problematic on scale-up
- > Design processes that will minimize or avoid scale-up issues
- > Select operating methods and equipment for effective scale-up
- > Calculate heat removal rates and safe rates of addition of reagents
- > Determine mixing requirements for scale-up
- > Design crystallizations which can be successfully operated at scale
- > Predict the filterability of solid products upon scale-up
- > Minimize the effects of scale-up on yield, selectivity and product purity

# SECRETS OF BATCH PROCESS SCALE-UP

10-12 April 2018 Boston, USA

## NEW FAST ONLINE REGISTRATION

Why not register quickly online and receive instant confirmation? Look for the **register** button on the event of your choice.

[www.scientificupdate.com](http://www.scientificupdate.com)

No. of attendees  @ \$2200

**Special Offer!** Register 2 delegates and receive 5% on 2nd booking  
Register 3 delegates and receive 10% on 3rd booking  
Register 4 or more delegates and receive a 15% discount

### Payment Methods

Payment will be made by:

Cheque  Bank Transfer  Credit Card

In Currency:

Dollars  GBP\*  or Euros\*

We accept the following credit cards:

Amex\* Mastercard Visa

To pay by credit card a secure link will be provided once you receive your booking confirmation email, this will then take you to a secure payment gateway.

\*payments via Amex can only be made in US dollars

#### \* Currency Payments

If you select to pay in GBP, or Euros the amount charged will be based on the exchange rate at the time of preparing the invoice.

#### Discounts

Complete the details for either two or three delegates and your discount will automatically be applied. This offer only applies where all delegates are booked simultaneously and at the same billing address.

#### Cancellations

Should you be unable to attend and cancel in writing no later than 1 month before the start of the course, Scientific Update will refund your registration fee less £300 (or equivalent in €/£) processing fee. Unfortunately refunds are not possible within 1 month of the course date. Substitutions can be made at any time.

#### Data Protection

Scientific Update Ltd is registered under the Data Protection Act 1998. We will store your information securely and only share your contact details with other attendees at this event. If you are happy for your details to be passed to any third parties please tick here:

For full terms of business and payment details please see our website
